## Secondary Herds

Do you have a secondary herd? Is this a secondary herd?

Sometimes there will be a need for a herd to be analysed in SENEPOL BREEDPLAN in association with other herds.

**Example** Where a number of breeders all run their animals together on the same property, for example family members. The animals are registered as being bred by different breeders but should be **directly compared** for performance analysis.

If for any reason herds of this type stop being run in association, we need to be notified of an approximate date when this occurred.

For this association type we need to know the herds involved and the primary performance herd with which the secondary herds are running.

For example:      Type 2:    Primary herd is ABC.  
  The secondary associated herds are MNO & RST.

For more information on secondary herds please contact your BREEDPLAN processor.
